MODULE 1: Reading and Writing (27 Questions)

Directions:

The questions in this section address a number of important reading and writing skills. Each question includes one or more passages, which may include a table or graph. Read each passage and question carefully, and then choose the best answer to the question based on the passage(s).

All questions in this section are multiple-choice with four answer choices. Each question has a single best answer.

1. José Rizal, a Filipino nationalist and polymath, played a pivotal role in his country's history: his writings inspired a revolution against Spanish colonial rule. Though he did not directly advocate for violent uprising, his novels *Noli Me Tángere* and *El Filibusterismo* exposed the injustices of the colonial system, making him a _____ figure in the movement for Philippine independence.
   Which choice completes the text with the most logical and precise word or phrase?
   A. controversial
   B. reluctant
   C. symbolic
   D. dominant

2. The fall of the Berlin Wall in 1989 was not a single planned event but rather the culmination of mounting political pressure. When a government spokesperson mistakenly announced immediate border openings, crowds gathered at checkpoints, forcing guards to _____ the gates without official orders.
   Which choice completes the text with the most logical and precise word or phrase?
   A. reinforce
   B. dismantle
   C. open
   D. monitor

3. A 2023 study by Dr. Lena Chen and her team, which analyzed microbial life in deep-sea vents, revealed organisms with unprecedented heat resistance. These extremophiles, which thrive in temperatures exceeding 120°C, may hold the key to understanding the _____ of life in extreme environments.
   Which choice completes the text with the most logical and precise word or phrase?
   A. limitations
   B. destruction
   C. origins
   D. resilience

4. The axolotl (*Ambystoma mexicanum*), a Mexican salamander, possesses remarkable regenerative abilities—it can regrow entire limbs, spinal cords, and even parts of its heart. This makes the species _____ subject for medical researchers studying tissue regeneration.
   Which choice completes the text with the most logical and precise word or phrase?
   A. an unfortunate
   B. a valuable
   C. a dangerous
   D. a common

0 8 2 1 7 0 2 7 6 0 7 6

5. According to cybersecurity expert Dr. Benjamin Clarke, the increasing sophistication of phishing attacks requires more robust digital literacy training. He contends that human error remains the weakest link in security systems, making comprehensive education _____ for organizational safety.
   Which choice completes the text with the most logical and precise word or phrase?
   A. optional
   B. irrelevant
   C. essential
   D. excessive

6. Archaeologist Maria Reiche dedicated her life to studying Peru's Nazca Lines, concluding they formed an astronomical calendar. Recent research by Dr. Masato Sakai, however, suggests the geoglyphs may have served as pathways for ritual processions, _____ Reiche's initial hypothesis.
   Which choice completes the text with the most logical and precise word or phrase?
   A. confirming
   B. complicating
   C. dismissing
   D. popularizing

7. The following text is adapted from Mary Oliver's poem "The Summer Day":
   Tell me, what is it you plan to do
   with your one wild and precious life?
   Which choice best states the main purpose of the text?
   A. To warn about life's dangers
   B. To question life's purpose
   C. To describe summer activities
   D. To celebrate youthfulness

8. The following text is adapted from F. Scott Fitzgerald's *The Great Gatsby*:
   [Gatsby] smiled understandingly—much more than understandingly. <u>It was one of those rare smiles with a quality of eternal reassurance in it, that you may come across four or five times in life</u>.
   Which choice best describes the function of the underlined sentence in the text as a whole?
   A. It reveals Gatsby's mysterious nature.
   B. It suggests Gatsby's smile was insincere.
   C. It emphasizes the uniqueness of Gatsby's smile.
   D. It contrasts Gatsby with other characters.

9. Text 1:
   Many ecologists have argued that forest fires are inherently destructive events that should be prevented whenever possible to preserve ecosystems.
   Text 2:
   Ecologist Dr. Anya Petrova's research in Yellowstone National Park showed that certain plant species rely on periodic fires for seed germination. Her findings indicate that fire suppression can actually reduce biodiversity in fire-adapted ecosystems.
   Based on the texts, how would Dr. Petrova (Text 2) most likely respond to the "inherently destructive" view discussed in Text 1?

0 8 2 1 7 0 2 7 6 0 7 6

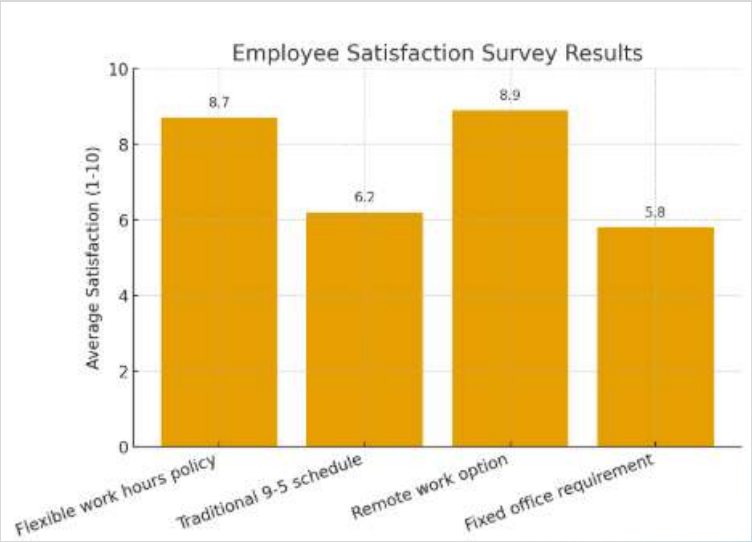
Dokumen ini bersifat RAHASIA DAN MILIK INTELEKTUAL LENTERAGO.
Segala bentuk reproduksi atau distribusi tanpa izin tertulis dapat ditindak sesuai hukum yang berlaku.

A. By arguing that it fails to recognize the ecological benefits of fires in certain ecosystems
B. By asserting that modern firefighting technology has made fire suppression more effective
C. By claiming that forest fires should indeed be prevented to protect animal habitats
D. By suggesting that the frequency of forest fires has increased due to human activity

10. Jupiter's moon Europa has a subsurface ocean beneath its icy crust. However, this ocean would be impossible to study directly with current technology because the ice shell is estimated to be 10-15 miles thick—far too dense for any probe to penetrate with existing drills.
According to the text, why would Europa's ocean be impossible to study directly now?
A. Because the ocean is too deep beneath the surface
B. Because current drills cannot penetrate the thick ice
C. Because Europa's surface temperature is too cold
D. Because Jupiter's radiation would damage probes

11. In recent decades, South Korea has transformed into a global technology leader through substantial investment in research and education. Companies like Samsung and LG have become household names worldwide, illustrating the success of this focused economic development strategy.
Which choice best states the main idea of the text?
A. South Korea's technology companies compete with each other
B. South Korea's economic strategy has made it a technology leader
C. Samsung and LG are the most important Korean companies
D. Research and education are important worldwide

12. A group of researchers investigated employee's work and life balance in the workplace. Researchers concluded that workplace flexibility correlates with higher employee satisfaction.



Which choice best describes data from the graph that support the researchers' conclusion?

0 8 2 1 7 0 2 7 6 0 7 6

Dokumen ini bersifat RAHASIA DAN MILIK INTELEKTUAL LENTERAGO.
Segala bentuk reproduksi atau distribusi tanpa izin tertulis dapat ditindak sesuai hukum yang berlaku.

A. Employees with flexible work hours reported higher satisfaction than those with traditional schedules
B. Some employees preferred traditional work schedules
C. Remote work received the highest satisfaction rating
D. Fixed office requirements had the lowest satisfaction

13. Dr. Elena Foster hypothesized that the bright coloration of poison dart frogs serves primarily as camouflage in their native rainforest habitats, helping them blend with colorful flowers and foliage. She predicted that predators would be less likely to detect these frogs in visually complex environments.
Which finding, if true, would most directly undermine Foster's hypothesis?
A. Predators consistently avoid poison dart frogs in both simple and complex environments
B. Poison dart frogs are most often found on dark, monochromatic forest floors rather than colorful flowers
C. The frogs' toxicity levels vary significantly between different populations
D. Some predator species have developed immunity to the frogs' toxins

14. Toni Morrison's novel *Beloved* explores the lingering trauma of slavery through supernatural elements and nonlinear narrative. Critics praise Morrison's ability to _____ the psychological impact of historical violence in ways that realistic fiction cannot.
Which choice most logically completes the text?
A. avoid discussing
B. simplify
C. convey
D. overlook

15. The tardigrade, or water bear, is a microscopic animal known for its extraordinary survival abilities. These creatures can withstand extreme conditions—including radiation, dehydration, and the vacuum of space—by entering a dormant state called cryptobiosis, making them _____ subjects for astrobiological research.
Which choice most logically completes the text?
A. typical
B. ideal
C. reluctant
D. endangered

16. The Renaissance period witnessed a remarkable flourishing of art and learning in Europe. Scholars have debated whether this cultural rebirth was primarily driven by the rediscovery of classical texts or by _____ factors like increased trade and urbanization.
Which choice most logically completes the text?
A. artistic
B. philosophical
C. socioeconomic
D. religious

0 8 2 1 7 0 2 7 6 0 7 6

17. The monarch butterfly's annual migration from Canada to Mexico is one of nature's most spectacular journeys. These fragile insects travel up to 3,000 miles to reach their wintering grounds, a feat that continues to _____ scientists studying animal navigation.
    Which choice most logically completes the text?
    A. intimidate
    B. baffle
    C. reassure
    D. disappoint

18. Photosynthesis _____ the process by which plants convert sunlight into chemical energy.
    Which choice completes the text so that it conforms to the conventions of Standard English?
    A. are
    B. were
    C. is
    D. be

19. The Industrial Revolution _____ in Britain during the late 18th century before spreading to other parts of Europe and North America.
    Which choice completes the text so that it conforms to the conventions of Standard English?
    A. begin
    B. begins
    C. began
    D. begun

20. Neither the students nor the teacher _____ aware of the schedule change.
    Which choice completes the text so that it conforms to the conventions of Standard English?
    A. was
    B. were
    C. are
    D. have been

21. The novel's protagonist, despite facing numerous challenges, _____ to maintain her optimism throughout the story.
    Which choice completes the text so that it conforms to the conventions of Standard English?
    A. manage
    B. manages
    C. managing
    D. managed

0 8 2 1 7 0 2 7 6 0 7 6

Dokumen ini bersifat RAHASIA DAN MILIK INTELEKTUAL LENTERAGO.
Segala bentuk reproduksi atau distribusi tanpa izin tertulis dapat ditindak sesuai hukum yang berlaku.

22. Marie Curie _____ the first woman to win a Nobel Prize and the only person to win Nobel Prizes in two different scientific fields.
Which choice completes the text so that it conforms to the conventions of Standard English?
A. was
B. were
C. are
D. be

23. The author's latest book, which has received critical acclaim, _____ several important social issues through its complex characters and plot.
Which choice completes the text so that it conforms to the conventions of Standard English?
A. explore
B. explores
C. exploring
D. explored

24. These are the notes that were taken by a student:
- NASA's James Webb Space Telescope launched in December 2021
- It can detect infrared light from distant galaxies
- This allows observation of the universe's first galaxies
- Scientists hope to learn about early galaxy formation

The student wants to explain the telescope's significance for studying early galaxies. Which choice most effectively uses relevant information from the notes to accomplish this goal?
A. NASA launched the James Webb Space Telescope in December 2021 to study distant galaxies.
B. The James Webb Space Telescope's ability to detect infrared light enables scientists to observe the universe's first galaxies and study early galaxy formation.
C. Scientists hope to learn about galaxy formation using the James Webb Space Telescope, which detects infrared light.
D. The James Webb Space Telescope, launched in December 2021, can detect infrared light from distant galaxies.

25. These are notes that were taken by a student:
- Abdulrazak Gurnah won the 2021 Nobel Prize in Literature
- He was born in Zanzibar and writes in English
- His novels explore themes of colonialism and displacement
- Paradise (1994) was shortlisted for the Booker Prize

The student wants to introduce Gurnah's work to an audience unfamiliar with him. Which choice most effectively uses relevant information from the notes to accomplish this goal?
A. Abdulrazak Gurnah, born in Zanzibar, writes in English and won the Nobel Prize in Literature in 2021.
B. The 2021 Nobel Prize in Literature was awarded to Abdulrazak Gurnah, who explores colonialism and displacement in novels like Paradise.
C. Paradise was shortlisted for the Booker Prize in 1994, before Gurnah won the Nobel Prize in 2021.

0 8 2 1 7 0 2 7 6 0 7 6

Dokumen ini bersifat RAHASIA DAN MILIK INTELEKTUAL LENTERAGO.
Segala bentuk reproduksi atau distribusi tanpa izin tertulis dapat ditindak sesuai hukum yang berlaku.

D. Abdulrazak Gurnah's novels explore themes of colonialism, and he writes in English despite being born in Zanzibar.

26. These are notes that were taken by a student:
    - The Strait of Hormuz is a strategic waterway
    - It connects the Persian Gulf with the Gulf of Oman
    - Approximately 20% of the world's petroleum passes through it
    - Tensions often arise there due to its importance for global oil trade

    The student wants to emphasize the strait's global economic significance. Which choice most effectively uses relevant information from the notes to accomplish this goal?

    A. The Strait of Hormuz connects the Persian Gulf with the Gulf of Oman and is strategically important.
    B. Tensions often arise in the Strait of Hormuz because it is a strategic waterway for global trade.
    C. The Strait of Hormuz is globally significant because approximately 20% of the world's petroleum passes through this strategic waterway.
    D. The Strait of Hormuz is located between the Persian Gulf and the Gulf of Oman, and petroleum travels through it.

27. These are notes that were taken by a student:
    - Taylor Swift began her career in country music
    - She transitioned to pop music with her 2014 album *1989*
    - She re-recorded her early albums to control her master recordings
    - Her "Eras Tour" (2023) became the highest-grossing concert tour in history

    The student wants to demonstrate Swift's business acumen and artistic evolution. Which choice most effectively uses relevant information from the notes to accomplish this goal?

    A. Taylor Swift began in country music, switched to pop with *1989*, and set tour records with her "Eras Tour."
    B. Taylor Swift's strategic decision to re-record her early albums to control her masters and her successful transition from country to pop with *1989* demonstrate both her business acumen and artistic evolution.
    C. Taylor Swift's "Eras Tour" in 2023 became the highest-grossing concert tour ever, showing her popularity.
    D. Taylor Swift started in country music before moving to pop music and re-recording her albums.

MODULE 2:

Directions:

The questions in this section address a number of important reading and writing skills. Each question includes one or more passages, which may include a table or graph. Read each passage and question carefully, and then choose the best answer to the question based on the passage(s).

All questions in this section are multiple-choice with four answer choices. Each question has a single best answer.

28. A recent revival of Tennessee Williams' *A Streetcar Named Desire* (1947) highlights the play's enduring power. Critics note that the production successfully captures the psychological tension and raw emotion of the original, making the descent of Blanche DuBois feel both inevitable and deeply _____.
    Which choice completes the text with the most logical and precise word or phrase?
    A. humorous
    B. unsettling
    C. predictable
    D. triumphant

29. The song "A Change Is Gonna Come," written and performed by Sam Cooke, is a landmark of the civil rights movement: its powerful lyrics and soaring melody articulate both the struggle for equality and a profound sense of hope. Cooke's delivery makes the listener feel the weight of the struggle, yet the song's conclusion is ultimately _____.
    Which choice completes the text with the most logical and precise word or phrase?
    A. despairing
    B. triumphant
    C. ambiguous
    D. ironic

30. Archaeologists Dr. Kenji Matsuo and Dr. Elena Petrova recently uncovered a burial site in Anatolia containing artifacts from a previously unknown Bronze Age culture. The discovery includes distinctive pottery and metalwork that do not match those of neighboring civilizations, suggesting the society was highly _____.
    Which choice completes the text with the most logical and precise word or phrase?
    A. insular
    B. influential
    C. derivative
    D. transient

31. (Adapted from Langston Hughes's "The Negro Speaks of Rivers")
    I've known rivers ancient as the world and older than the flow of human blood in human veins. My soul has grown deep like the rivers.
    Which choice best describes the overall structure of the text?
    A. It presents a chronological narrative of historical events.
    B. It makes an extended comparison between the speaker's soul and ancient rivers.
    C. It argues for the importance of environmental conservation.
    D. It contrasts ancient civilizations with modern society.

0 8 2 1 7 0 2 7 6 0 7 6

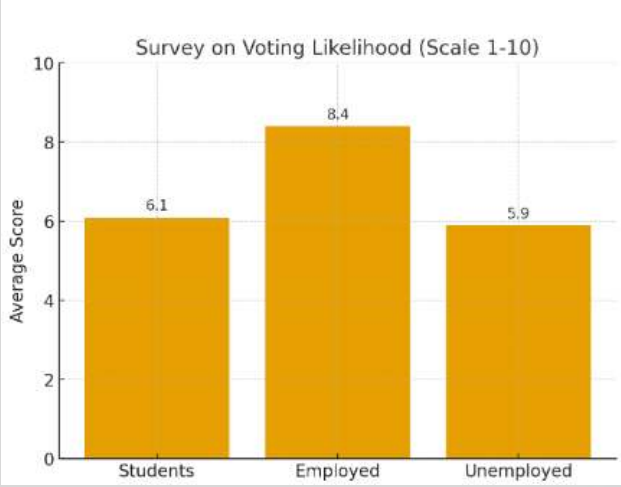
Dokumen ini bersifat RAHASIA DAN MILIK INTELEKTUAL LENTERAGO.
Segala bentuk reproduksi atau distribusi tanpa izin tertulis dapat ditindak sesuai hukum yang berlaku.

32. Historian Dr. Maria Garcia argues that the economic policies of the 1980s had profound social consequences. She points to the widening wealth gap and the decline of manufacturing jobs as evidence that these policies disproportionately affected middle-class communities.
Which choice best describes the function of the underlined portion in the text as a whole?
A. It provides examples that support Garcia's argument.
B. It introduces a counterargument to Garcia's main claim.
C. It questions the validity of Garcia's evidence.
D. It summarizes Garcia's primary thesis.

33. (Adapted from Charlotte Brontë's *Jane Eyre*)
I am no bird; and no net ensnares me: I am a free human being with an independent will. Which I shall now use to leave you.
Which choice best describes the function of the underlined sentence in the text as a whole?
A. It reveals the speaker's fear of confinement.
B. It establishes the speaker's independence and resolve.
C. It expresses the speaker's desire for friendship.
D. It explains the speaker's physical limitations.

34. (Adapted from Oscar Wilde's *The Picture of Dorian Gray*)
Dorian Gray sank down into the sofa and turned his head away. "You have poisoned my life with your influence," he cried. Yet, even as he said this, he knew that the true poison was within himself.
According to the text, what is true about Dorian?
A. He is grateful for the other person's influence.
B. He is unaware of his own role in his downfall.
C. He blames another while acknowledging his own responsibility.
D. He believes he can easily escape his situation.

35. Survey on Voting Likelihood (Scale 1-10, 10 = most likely)



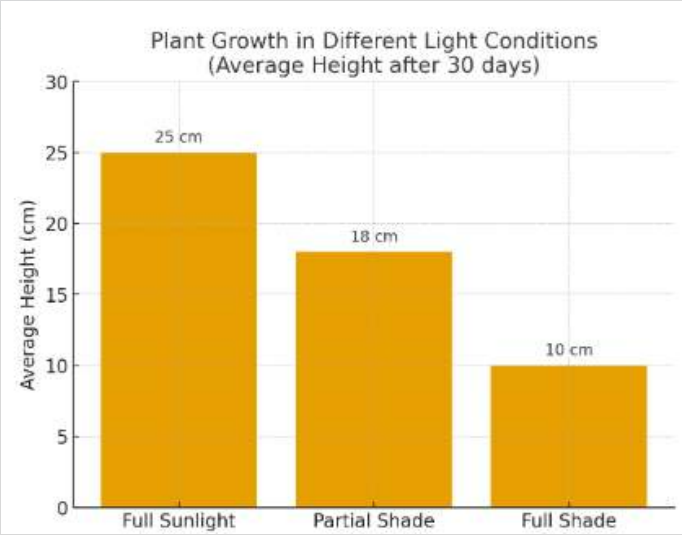
A survey was conducted to assess likelihood of employment status, including students, in correlation with their will to vote.. Researchers claim that individuals with greater economic stability, typically associated with employment, are more likely to vote in elections.
Which choice best describes data in the graph that support the researchers' claim?

0 8 2 1 7 0 2 7 6 0 7 6

Dokumen ini bersifat RAHASIA DAN MILIK INTELEKTUAL LENTERAGO.
Segala bentuk reproduksi atau distribusi tanpa izin tertulis dapat ditindak sesuai hukum yang berlaku.

A. Employed individuals reported a higher average likelihood of voting than students or unemployed individuals.
B. Students reported a slightly higher likelihood of voting than unemployed individuals.
C. Unemployed individuals reported the lowest average likelihood of voting.
D. The average scores for all groups were above 5.

36. Plant Growth in Different Light Conditions (Average Height in cm after 30 days)



A student does a biology experiment to investigate sunlight impact to plant growth. A student concluded that increased sunlight exposure results in greater plant growth. Which choice best describes data in the graph that support the student's conclusion?
A. Plants in partial shade grew taller than those in full shade.
B. Plants in full sunlight grew the tallest.
C. Plants in full shade grew the least.
D. There was a growth difference between all three groups.

37. Geologists studying a newly discovered cave system in Slovenia found that the stalactites and stalagmites formed at a rate much faster than previously thought possible. The team, led by Dr. Anja Kovač, concluded that unique mineral-rich water flowing through the cave accelerates the formation process.
Which finding, if true, would most strongly support the team's conclusion?
A. The cave is located in an area with high levels of annual rainfall.
B. Water samples from the cave contain a high concentration of dissolved calcite.
C. Similar cave systems in the region show the same rapid formation.
D. The cave's temperature remains constant throughout the year.

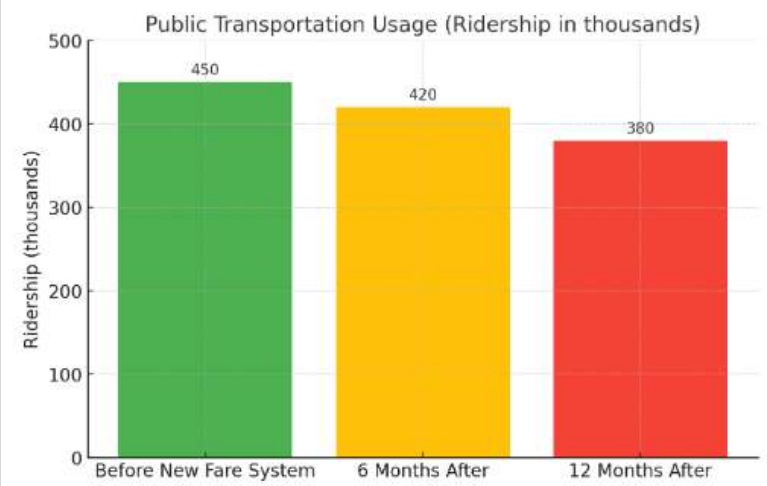
38. Marine biologists hypothesize that the bioluminescent patterns of certain deep-sea jellyfish serve to startle or confuse predators, giving the jellyfish a chance to escape. They predict that jellyfish with more complex light displays will be more likely to survive predator encounters.
Which finding, if true, would most directly support the researchers' hypothesis?
A. Predators in the deep sea are also bioluminescent.
B. Jellyfish with simpler light displays are consumed by predators at a higher rate.
C. The light displays are used to attract smaller prey.
D. The intensity of the light varies with water temperature.

0 8 2 1 7 0 2 7 6 0 7 6

Dokumen ini bersifat RAHASIA DAN MILIK INTELEKTUAL LENTERAGO.
Segala bentuk reproduksi atau distribusi tanpa izin tertulis dapat ditindak sesuai hukum yang berlaku.

39. Proponents of the "media violence" theory claim that exposure to violent video games increases aggression in adolescents. However, a longitudinal study by Dr. Lena Flores tracked 500 teenagers for five years and found no correlation between game preferences and aggressive behavior.
Which finding from Flores's study, if true, would most directly weaken the claim made by people who favor the "media violence" theory?
A. Adolescents who played violent games frequently had slightly lower academic grades.
B. Levels of aggression in teenagers were more strongly linked to family environment than to media consumption.
C. Many teenagers reduced their gaming time as they grew older.
D. The most popular games among participants were non-violent puzzle games.

40. Public Transportation Usage (Ridership in thousands)



Public transportation are getting more relevant. Researchers concluded that the new, more expensive fare system has led to a significant and sustained decrease in public transportation ridership.
Which choice best describes data from the graph that support the researchers' conclusion?
A. Ridership was highest before the new fare system was implemented.
B. Ridership decreased in the 6 months after the new system was implemented.
C. Ridership showed a continuous decline over the 12 months following the new system.
D. Ridership decreased by 70,000 between the 6-month and 12-month marks.

41. An arts journalist wrote that curator Fatima al-Fihri's exhibition, "Dialogues with the Desert," successfully challenges the Western gaze on Middle Eastern art. Rather than presenting a monolithic view, the exhibition showcases the region's diverse artistic voices and contemporary concerns.
Which finding, if true, would most directly support the journalist's claim?
A. The exhibition includes works by artists from ten different Middle Eastern countries, addressing themes from gender identity to urbanization.
B. The exhibition has broken attendance records at the museum where it is being held.
C. All the artworks in the exhibition were created in the last five years.
D. The exhibition catalog was translated into three different languages.

42. For thousands of years, the Indigenous peoples of the Pacific Northwest _____ intricate totem poles, which served as markers of lineage, history, and cultural beliefs.
Which choice completes the text so that it conforms to the conventions of Standard English?
A. to carve
B. have carved
C. carving
D. carves

43. While many video game developers pursue hyper-realistic graphics, some studios deliberately use pixel art—a style reminiscent of early arcade games—to evoke a sense of nostalgia and _____ a distinctive visual identity.
Which choice completes the text so that it conforms to the conventions of Standard English?
A. create
B. creates
C. creating
D. to create

44. In the 1940s, a businesswoman named Ruth Handler noticed her daughter preferring to give adult roles to paper dolls. This observation _____ her to develop a three-dimensional adult-bodied doll, which later became the Barbie doll.
Which choice completes the text so that it conforms to the conventions of Standard English?
A. leads
B. led
C. leading
D. lead

45. Beatrix Potter _____ best known for her children's books, such as The Tale of Peter Rabbit, but she was also a respected naturalist and conservationist.
Which choice completes the text so that it conforms to the conventions of Standard English?
A. is
B. are
C. were
D. be

46. The results of the study _____ published in a prestigious scientific journal next month.
Which choice completes the text so that it conforms to the conventions of Standard English?
A. is
B. are
C. will be
D. being

47. The geothermal springs in Iceland, which are heated by the Earth's internal energy, _____ thousands of tourists each year.
Which choice completes the text so that it conforms to the conventions of Standard English?
A. attracts
B. attract
C. attracting
D. has attracted

48. The author's first novel, which took nearly a decade to write, _____ multiple literary awards.
Which choice completes the text so that it conforms to the conventions of Standard English?
A. win
B. wins
C. won
D. winning

49. The Treaty of Versailles, signed in 1919, _____ the terms of peace after World War I and imposed heavy reparations on Germany.
Which choice completes the text so that it conforms to the conventions of Standard English?
A. establish
B. establishes
C. established
D. establishing

50. The poet's most celebrated work, a collection that explores themes of migration and identity, _____ widely anthologized.
Which choice completes the text so that it conforms to the conventions of Standard English?
A. are
B. is
C. were
D. being

51. In her novel Kindred, Octavia Butler blends historical fiction with science fiction to explore the legacy of slavery. _____, she uses time travel to force her modern protagonist to confront the brutal reality of the antebellum South.
Which choice completes the text with the most logical transition?
A. Specifically,
B. However,
C. Consequently,
D. Likewise,

52. These are notes that were taken by a student:
    - Ducklings expend significantly less energy when swimming behind their mother.
    - Naval architect Dr. Michael Smith used computer simulations to study this.
    - The simulations showed that the mother duck's wake pushes the ducklings forward.
    - This push reduces wave drag on the ducklings.

    The student wants to present the study and its methodology. Which choice most effectively uses relevant information from the notes to accomplish this goal?

    A. Dr. Michael Smith discovered that ducklings save energy by swimming in a line.
    B. Using computer simulations, Dr. Michael Smith studied how the mother duck's wake reduces wave drag on ducklings, explaining their energy savings.
    C. Ducklings experience less wave drag, which was studied using computer simulations.
    D. The energy savings of ducklings were explained by Dr. Michael Smith's research on wave drag.

53. These are notes that were taken by a student:
    - The planet Venus has a surface temperature of about 465°C.
    - This extreme heat is due to a runaway greenhouse effect.
    - Venus's atmosphere is 96% carbon dioxide.
    - The thick CO_2 atmosphere traps solar energy efficiently.

    The student wants to explain the primary cause of Venus's high surface temperature. Which choice most effectively uses relevant information from the notes to accomplish this goal?

    A. Venus is very hot, with a surface temperature of 465°C, and has an atmosphere of carbon dioxide.
    B. Venus's extreme surface temperature is primarily caused by a runaway greenhouse effect, driven by its thick atmosphere of carbon dioxide that traps solar energy.
    C. The greenhouse effect on Venus is caused by its high temperature and carbon dioxide atmosphere.
    D. Solar energy is trapped by the atmosphere of Venus, which is made of carbon dioxide.

54. These are notes that were taken by a student:
    - The Hoover Dam was constructed on the Colorado River between 1931 and 1936.
    - It provides hydroelectric power to millions of people in Nevada, Arizona, and California.
    - The dam was built during the Great Depression, creating thousands of jobs.
    - It controls flooding and provides a reliable water supply for irrigation.

    The student wants to emphasize the dam's multipurpose utility. Which choice most effectively uses relevant information from the notes to accomplish this goal?

    A. The Hoover Dam was built during the Great Depression, which created jobs.
    B. The Hoover Dam provides hydroelectric power, controls flooding, and supplies water for irrigation, demonstrating its multiple benefits.
    C. The Hoover Dam is on the Colorado River and was completed in 1936.
    D. Millions of people get power from the Hoover Dam, which also controls the Colorado River.
